#### REMARKS

The figures of births and deaths shown in this statement for week ending the 21st July, 1956, relate to 260 towns with an estimated population of 36,311 thousands. The total number of towns is 318 and their population is 41,584 thousands. Thus 82% of the total number of towns representing 87% of the total ropulation is covered in this statement. The number of births and deaths recorded in these towns were 18,779 and 8,119 representing birth and death rates of 26.9 and 11.6 per thousand of population respectively.

(a) States (Part A and C):—The data here relate to 216 towns with an estimated population of 31,189 thousands. The total number of towns is 253 and their population is 33,500 thousands. Thus 85% of the total number of towns representing 93% of the total population is covered. The number of births and

deaths recorded in these towns were 16,498 and 7,190 representing birth rates and death rates of 27.5 and 12.0 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) States (Part B):—The data here relate to 44 towns with an estimated population of 5,122 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 68% of the total number of towns representing 63% of the total population is covered. The number of births and deaths recorded in these towns were 2,281 and 929 representing birth and death rates of 23.2 and 9.4 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.

\*Pondicherry town has been included.
